

HSE – Online survey to develop Ireland’s Action Plan to Eliminate Cervical Cancer Date: 4 March 2024

 **Cervical Cancer Elimination Day of Action**

The HSE is developing Ireland’s action plan to eliminate cervical cancer by 2040. It is calling on everyone in Ireland to share their views and experiences through a new online consultation survey open from 4 March to 5 April.

The survey is gathering information on topics such as:

- your views and/or experience of HPV vaccination in Ireland
- your views and/or experience of cervical screening in Ireland
- your experiences if you have had cervical cancer treatment
- your views on how HPV vaccination and cervical screening services can be improved
- the top 3 things you would like to see included in Ireland’s action plan to eliminate cervical cancer.

The HSE would be grateful if you would both complete the survey and encourage your teams

and colleagues to also share their views to help develop Ireland's Cervical Cancer Elimination Action plan.
