

# Management Development Skills Course – 10 October & 7 November

One of the objectives of a Supervisor/Manager is to manage the performance of their team by ensuring that they are performing to the best of their ability and engaged in the business objectives. This process includes setting performance goals, enabling the team to perform and manage individuals when performance is off target. To manage others, you need a better understanding of yourself.

This two day interactive workshop will focus on the development of the supervisor/manager.

The course runs on two days from 10.00am – 5.00pm, starting on 10 October. For more information and to enrol click [here](#).
