

Vaccination of 12-15 year olds

The HSE has announced that registration for COVID-19 vaccination for 12-15 year olds with parental consent will open tomorrow, Thursday 12 August. As such, this age cohort will also be eligible to be vaccinated in a participating pharmacy. The Operational Guidance has been updated to cover parent/guardian consent and patient assent for 12-15 year olds. The updated guidance is available [here](#), and information on vaccination of 12-15 year olds including obtaining consent is available [here](#). The HSE has advised us that information leaflets for the public and hard copy consent forms will be distributed to pharmacies this week.
